

# BASKONIA ALAVÉS INTERNATIONAL ACADEMY

## The Academy

The Baskonia-Alavés Academy has been set up in order to put the club's more than 30 years of training experience to use, providing players who want to perfect their game with training programmes ranging from a month to a year in duration.

The Deportivo Alavés Academy offers players all the material and human resources enjoyed by its first team, so as to be able to substantially improve the player's technique and tactics.

In facilities designed for the training of professional players, we apply the same methodology used by Deportivo Alavés and developed by its technical training staff, who will follow your evolution closely. Should you show the same flair as the club's players, you too will train with them, and with enough improvement, you could receive a scholarship.

Each week, you will compete against top teams, and your progress will be tracked using cutting edge follow-up and analysis systems.

You will be able to continue with your studies while you train, and you will also learn a new language. Your all-round training and education are very important to us.

You will work hard, like the rest of the club's players.

**You will discover what it means to be Baskonia-Alavés.**

## Services
